

STRABOX CHANGES THE WAY YOU LOOK AT STEREO IMAGERY

The Strabox Stereo Viewing System offers exceptional high quality, sharp bright and flicker-free stereo images at very affordable prices.

Unlike other stereo viewing systems, Strabox offers a stable and relaxing sight enabling softcopy data production with maximum comfort for the operator.

Strabox provides contained brightness for use in all environments without disturbing influences of ambient light.

ABOUT STRABOX

Using 2 standard high quality LCD screens with high pixel resolution, the Strabox offers outstanding stereo viewing results, perfectly fit for intensive use and data capture. Sizes of 19", 20" and 24" are available. Delivery includes power supply, USB-video cables and 2 passive polarized glasses.

PLATFORM SUPPORT

Strabox is supported on Windows and Mac OSX (Intel Dual Core processors).
Tested on Mac with Orbit Strabo Photogrammetry solutions.

Photogrammetric production desk equipped with Orbit GIS, Strabo Photogrammetry Suite and 24" Strabox stereo viewing system.
